Operetta Presented By Opera Club

Councillors Request Cut In School Division Budget

At the March 19th meeting of the board of the Sturgeon School Division, it was learned that the council of the Municipal District of Sturgeon had not yet approved the 1952 School Requisition. Reason for this is that the new school budget shows an increase of more than 20% over the previous year. It is planned to hold a joint meeting on Thursday, March 27, to discuss the matter. If the two executive groups fail to reach agreement the matter will be referred to the Board of Public Utility Commissioners, which will then arbitrate the matter.

Other items of business attended to by the meetings in March, including the special Monday, March 10, meeting, are as follows:

The special meeting was held at the call of the chairman, Mr. Paul Chanut, Monday, March 10, for the purpose of passing the Budget Estimates for the year 1952, and interviewing architects with regards to the building program.

On the motion of Mr. Neil Ross the budget estimates in the amount of \$485,874 were approved. The requisition was set at the sum of \$369,728.

Architects interviewed were, Neil C. McKernan, Mr. Ascher of the firm of Blakey, Blakey and Ascher, and W. Ralph Brownlee.

A brief, which had been prepared by the secretary-treasurer, outlining the needs for additional accommodation in the Divisional Schools for the coming school year, was studied by the Divisional Board and approved. This was to be forwarded to the Department of Education.

At this meeting, arrangements were made tentatively for a banquet for the school-bus drivers, operators and patrols. The banquet would be in the community hall at Bon Accord on April 9.

At this meeting, it was decided to request the Department of Education to give approval for the appointment of foremen for the proposed new school at Legal and for the completion of the St. Albert school. The remuneration of these foremen was not to exceed 8 per cent of the total cost of the projects as estimated by the architect.

This request was forwarded to the Department of Education and was not approved.

REGULAR MEETING

The regular monthly meeting of the divisional board was held on March 19 in the divisional office at Morinville.

All trustees were present; namely Messrs. Paul Chauvet, chairman, Arthur McCue, vice-chairman; Trustees Allen, Cunningham, Ross and Messier, also the superintendent, R. J. Scott and E. Meaden, secretary-treasurer.

On the motion of Mr. Allen, the minutes of the meeting of March 16 and the February meeting were approved.

On the motion of Mr. McCue the fee for the auditor for the year 1952 was set at \$200.

On the motion of Mr. Cunningham the monthly accounts as submitted by the secretary-treasurer were ordered paid.

On the motion of Mr. Allen it was decided that any buses brought into the Sturgeon School Division in future for operation as a school bus be classified by Mr. Kenway of the highway traffic board before acceptance. A letter from Mr. Kenway certifying the proper

classification of the bus to be requested.

On the motion of Mr. Messier it was decided to pay the bank loan to the Royal Bank of Canada at Morinville; principal \$12,000, interest \$68.17.

On the motion of Mr. Allen it was decided to sell one acre of land, namely the Bellerose S.D. site, for the sum of \$60.

On the motion of Mr. Chauvet it was decided to sell one acre of land namely the site of the Dillgence S.D. for the sum of \$50.

On the motion of Mr. Cunningham it was decided to accept the arrangement offered by the Department of Highways covering the cost of the land taken from the Rlopel S.D. for highway purposes.

ST. ALBERT NEWS BRIEFS

Constable D. Duval of the R.C. M.P. force at Stettler, spent the week-end at the home of his uncle, Mr. E. Maheux. Mr. Duval had just returned from Eastern holidays.

Mr. and Mrs. Stan Hauptman motored to British Columbia for a few weeks' holidays.

Several persons from St. Albert attended an operetta in Morinville last Friday night. They enjoyed it immensely.

Born to Mr. and Mrs. W. Montpetit, a baby girl, weighing 8 lbs. 2 ounces. The baby was born on Thursday, March 20.

Fur trading is not a thing of the past in Canada by any means. In 1950, in the North West Territories alone, it was a big business, worth \$2,500,000.

Planning Survey To Find "Economic Value" Of Edmonton District Areas

At the meeting of the Edmonton District Planning commission held on March 15, Leonard Gertler, planning economist, reported on the progress of the industrial survey proceeding throughout the planning district.

He indicated that the survey had thus far been carried to the industry of Strathecona, Jasper Place and Beverly, and to the towns of Fort Saskatchewan, Leduc, Devon, Morinville, Stony Plain and the hamlet of Spruce Grove; 73% of the issued forms have been completed and returned.

It was explained that the survey within the towns is part of a program to find the special economic role of each within the district. Cost and condition of land available for industry and housing,

Beauty Rest

LANA TURNER, resembling a French doll in her white satin and lace corset, rests on the sidelines of her "set" at the M-G-M Studio during the filming of her forthcoming Technicolor musical, "The Merry Widow."

Barrhead To Have Drive-In Theatre

BARRHEAD—The busy little town of Barrhead is to have a drive-in theatre in the near future, according to Mr. Fred Trembley, who is financing the venture. Mr. Trembley has acquired land with the proper slope and landscaping to make the set-up practical, near the highway corner two miles north of Barrhead, and as soon as weather and frost conditions permit will start construction.

This is something new for strictly rural areas and Mr. Trembley is to be complimented on his pioneering spirit in promoting such a costly venture.

"THE DAUGHTER OF MOLLY O'DAY" PROVES SUCCESS HIT OF SEASON

MORINVILLE—The program staged in Morinville last Friday afternoon and evening to a large and appreciative audience by the Morinville Light Opera Club presenting "The Daughter of Molly O'Day" proved to be the hit of the season. The cast included members from Barrhead, St. Albert and Edmonton.

The part of Molly O'Day was played in a very pleasing manner by Arlene Jorgenson of Barrhead who recently returned from the coast after a successful season in Vancouver. The daughter of Molly O'Day was played by Carmen Teller of Morinville who, during the early part of the operetta gave an outstanding rendition of the "Jewel Song" from Faust. She was beautifully gowned and wearing a brilliant collection of jewels kindly loaned by Birks and Sons, Edmonton, for the occasion.

This scene was supported by Cameron Ross of St. Albert, and David Middleton as the footman proved one of the highlights of the operetta.

The part of the English lord, owner of the Haunted Norwood Castle, was played by Eric Winquest of Edmonton who gave an outstanding performance and displayed a bit of splendid acting

that won many favorable comments.

His young son, Thomas, was played by Reva Grant of Barrhead who started all the action in the production by running away and marrying a common Irish girl singer by the name of Molly O'Day, much to the disapproval of the old lord who had other plans for the boy.

The climax of the operetta came 15 years later when the son Thomas was killed in America and the old lord was presented with his granddaughter by Molly O'Day on the grounds he had more to offer her than she—and that she was all he had left.

Other members of the cast were Hilda Frolish of Barrhead as the music teacher who motored all the way from London to try and interest the old lord in his son's voice—but received a cool reception.

Morinville Juveniles Lost Provincial Championship By Only One Goal

MORINVILLE — The Morinville Lions Juveniles, sponsored by the Morinville Lions Club, came home from Drumheller without the coveted Provincial Championship, but with the knowledge that, as more than one Drumheller sports fan said, they played the best game of hockey seen in the mining town in many long years.

Throughout the entire series, Morinville undoubtedly had the edge of play, and provided leadership right up to the final whistle. In Drumheller, they lost only one of the two-game total goal series and that by only one goal.

In the second game at Drumheller, Morinville was leading the way with a 5-4 margin when, just eight seconds before the end of the last period, Drumheller managed to put in their fifth goal, which tied the game. As they had won the first game, their lucky last goal won for them the series.

The first game in Drumheller on Wednesday, March 19, ended in a score of 6 to 5 in favor of Drumheller. The second game, played March 20, ended in a 5 to 5 tie score.

Great credit is due to the coaching of the team, ably handled by Hymie Klein, who has for the second time brought Morinville into the provincial finals. Under his guidance Morinville has developed a good juvenile team, which was built up largely on the strength of his work with the Morinville Midgets of the 1950-51 season. It will be recalled that last year the Midgets won the Provincial Midget "B" championship.

This year Morinville has defeated such noted teams as Vegreville, Wetaskiwin and Ponoka, to earn the Northern Alberta Pro-

vincial championship.

The Lions Club committee which has "fathered" the boys who have brought fame and distinction to themselves and their town are: Manager, Art Soetaert, and committee members Wilfred Labonte, Joe St. Laurent and Hymie Klein.

Following are the lineups and summary of the final game in Drumheller:

LINEUPS

Drumheller: Kuryk; Hodgson, Durnie, Loughlin, Samuels, Sakal, D. Rehill, R. Rehill, I. Olson, Jenkins, K. O'son, Foster, Sparrow, Huculak, Pierce.

Morinville: Riopel; Chalifoux, Labonte, A. Kieser, Gervais, Robert Patry, Ronnie Patry, Morissette, Perreault, Martineau, F. Kieser, Pelletier, Akins, Borle, Majeau.

SUMMARY

First period—1, Drumheller, D. Rehill (R. Rehill-I. Olson) 6:29; 2, Morinville, Perreault (A. Kieser) 19:30.

Second period—3, Drumheller, Loughlin (Sakal) 9:47; 4, Morinville, Gervais 14:41; 5, Drumheller, Loughlin (Sakal) 17:21; 6, Morinville, Morissette (Robert-Ronnie Patry) 14:25.

Third period—7, Morinville, Perreault (F. Kieser) 2:20; 8, Drumheller, I. Olson (D. Rehill) 3:42; 9, Morinville, Ron Patry (Robert Patry) 9:35; 10, Drumheller, Foster (Sparrow-Jenkins) 19:52.

EDITORIALS

Exporting Tough Grain

Many years ago, when a shipment of eggs from China arrived at San Francisco it was found that the three weeks' travel across the warm Pacific, combined with the engine heat of the steamship, had caused most of the fertile eggs to hatch. So a shipment of baby chicks arrived in California, when only eggs had been ordered.

A similar change in the character of a ship's cargo was made last month when a shipment of tough, moisture laden wheat from Vancouver to Great Britain dried out sufficiently during the voyage by way of the Panama Canal to drop in moisture content and thus improve—rather than deteriorate—its grading during shipments.

Other importing nations have been watching this experiment with interest and will now take shipments of tough grain because of this successful demonstration. India is among such countries.

Urge More Uses For Coal

In urging a more aggressive policy with regard to the development and marketing of Alberta's vast coal deposits, the provincial Liberal party has adopted a line of conduct designed to extend the value and sale of western coal in the eastern markets of Canada.

These deposits of Alberta coal of a fine quality are recognized as among the greatest in the world and a large percentage of the population of the province, it is pointed out, is employed in the production of coal. The coal mines of Alberta hold some of the richest natural resources of the province. It is hoped that with the increased interest of chemical industries in cheap fuel the day is coming when these coal deposits will furnish one of the most valuable sources of material for the many products that science has won from coal.

A resolution was passed at the recent Liberal convention in Edmonton, urging that new uses for the tremendous reserves of Alberta coal be discovered through the Research Council of the province and that pilot plants be established to develop the by-products of these resources.

Establishment of a civil service commission for Alberta is one of the plans of the Liberal party if it should be elected to office in the near future. This commission would see that all appointments are made free from preferences and party selections, and solely on the grounds of merit and that all persons employed by the government are paid adequate salaries for their services.

Private Lives

The ladies, who watch prices more carefully than their husbands, are probably aware that in recent months there was a check in the rising cost of men's suits. Any of the ladies who looked into the matter likely found that part of the reason they could get good clothes at reasonable prices was in the expanded use of rayon either alone or blended with the natural fibres, wool and cotton.

Behind rayon stands the Canadian forests. For this textile material is made from wool fibre. It has been so successful that textile men predict that most men's suits made and sold in Canada in the future will contain at least some rayon.

The ladies, realizing that our forests are going to be quite important to their future budgets, may be expected to take an active interest in how our forest resources are employed and administered. It will be a good thing, since the men have not done the best possible job.

Note and Comment

We can easily manage, if we will only take, each day, the burden appointed for it. But the load will be too heavy for us if we carry yesterday's burden over again today, and then add the burden of the morrow to the weight before we are required to bear it.—John Newton.

Retirement at Sixty-Five

B. A. Lindberg, associate professor of Business Administration at Harvard University, says that compulsory or mandatory retirement at the age of sixty-five is meeting with a lot of resistance in the United States. The Harvard professor questions the mandatory retirement age as a lasting standard.

"Our data seems to suggest that an individual's capacity to adapt is not materially affected by age if the individual is in reasonably good health and if the individual is working in a business climate which demonstrates its faith in his ability to adapt himself and learn new schedules. In other words, if the business climate is favorable, the elderly person can not only be taught new tricks, he is full of them," Professor Lindberg says.

The Harvard professor believes health and advances in medical science will enable the average worker to remain efficient for a steadily increasing number of years. His words will be encouraging to many employees, who feel able and fit but who find themselves automatically retired at the age of sixty-five.

We Should Be Proud

Canadians, as a people, are tinged with an over-abundance of humility, modesty or plain inferiority complex when they consider their own achievements.

They tend to apologize for conditions and developments here and to regard accomplishments in Britain and the United States as something beyond the capabilities of this nation. Too often they take the attitude that nothing good can come out of Canada.

Humility is doubtless good in its place, but so is pride, and Canadians have much of which they should be proud. While still retaining the right of constructive criticism, Canadians should be proud of their democratic government which, in a world tending to extremes, has trod a middle of the road path. They should be proud of the freedom that is theirs, of the rights and privileges that have been handed down in trust from previous generations. They should be proud of their place (a prominent one) in the British Commonwealth under the sovereignty of their Liege Lady, Queen Elizabeth II.

Canadians are living in an expansionist age, a period in the nation's history when great developments are taking place in the country. Canada, for instance, produces half of the world's supply of newsprint, the second largest export wheat crop, 90% of the free world's supply of nickel and an important part of the zinc, copper, aluminum and other materials needed for the defence of the west. Vast developments are underway in oil, iron, uranium, industry, electrical power. Last year Canadians invested some 22% of their national income in new developments. Foreign capital is flowing into the country and more and more Canadian capital is being utilized to develop the natural resources and industry of the nation.

Canadians may well be proud, too, of the awakened interest in the arts. Across the land music festivals, drama festivals, art exhibits, ballet festivals show that this nation is not neglecting the finer things of life. More and more Canadians are aware of the fact that "culture" is not something for highbrows but may be enjoyed by everyone. Good music via the radio and performance of symphonies, choirs and soloists is becoming part of the daily living of millions of Canadians. Canadians are writing books, plays and poetry, are painting and composing as never before.

The second half of the twentieth century belongs to Canada. As Churchill said last month in Ottawa, "Upon the whole surface of the globe, there is no more spacious and splendid domain than Canada open to the activity and genius of free men." Let us be proud of what our nation of 14 million souls has accomplished, is accomplishing and will accomplish. We should be proud of Canada.

The Bible Today:

How many things that were articles of faith yesterday, are fables today.—Michael de Montaigne.

GET TO KNOW YOUR D.A.

By T. W. FUE

One of the most important functions of this paper, we feel, is its value in transmitting to our farmer readers the latest news on correct farming methods.

T. W. Fue

A circular put out by B. J. Whitbread, D.A. of the Edmonton area, summarizes services the District Agriculturist offers free to farmers.

If by reading the following information you are led to call your D.A. for assistance on even a minor point, any subscription price that we ever have charged you for this paper will be well repaid many times over. Here are agricultural services free for the asking—at this price can YOU afford not to use some of them?

Field Crops — Information on control weeds and mixtures of forage crops, their purchase and production.

Diseases and Insects — Identification and control.

Tree Planting — Shelter belts, road side plantings and fruit.

Weeds — Identification and control—chemicals.

Agricultural Engineering — Farm power, implement selection and adjustment. Building construction and renovation.

Livestock — Assistance in securing and selection of breeding stock of Beef and Dairy cattle, sheep and swine.

Feeder Associations — Information and assistance.

Purebred Sire Area — Organization.

Veterinary Services — Blood testing and vaccination for Bang's disease and T.B. Good. Laboratory diagnostic service with access to animals and post-mortem of cattle, sheep, poultry and fur-bearing animals.

Dairy — Cow testing for dairy herd improvement, production problems of dairy producers.

Poultry — Flock testing culling and banding. Individual service with poultry raising problems. Selection and marketing of "approved" and "registered" breeding stock.

Schools of Agriculture and Home Economics — Information on courses, scholarships, etc.

Junior Clubs — For boys: cereal and storage groups, Beef and Dairy cattle, swine and poultry. For girls: clothing, foods, home decoration and gardening.

Farm Labor — Domestic and general.

Home Economics — Practical, general and specific information on nutrition, clothing and home planning or anything associated with homemaking.

Farm Planning — To preserve soil fertility, prevent erosion, control weeds and increase revenues. To build a house or to get a bride, a fellow needs a plan! Why not for operating a farm?

We are well known at your municipal office, by members of the council, and in the field supervisor. Come up and see us sometime.

Miss Ruth Whaley, Home Economist, Edmonton District, Phone 28608.

J. M. Fontaine, District Agriculturist, Morinville and Sturgeon, Phone 28985.

B. J. Whitbread, District Agriculturist, Strathcona and Stoney Plain, Phone 28985.

H. J. Fulcher, Assistant District Agriculturist, Phone 28985.

9817 Jasper Avenue.

\$95 PER CANADIAN HEAD

When it is the money in our own pockets that is involved we Canadians are still careful of our dollars. Wage earners are concerned, and rightly so, over a dollar more or a dollar less in their pay envelopes; housewives know where and what for they spend every penny. But our attitude towards big government spending is different. When Ottawa spends a billion it gets hardly more attention than when the amount is a million, though of course Ottawa can spend only what is first or last taken from us in taxes.

The above observation is prompted by the speech of Paul Martin to an audience in Rochester, N.Y., when the Health Minister stated that Canadian governments and voluntary agencies will spend \$1,330,000,000 on interesting migration habits of birds in 1952. This amount amounts to \$44 per head of population. That figure has little meaning until we realize that the United Kingdom, where Canadians believe the welfare state is in full swing, is spending on social security only \$794,000,000, or about \$44 per head of population.

Some Canadians argue that the welfare state is far behind in matters of social security, that more tax money must be spent. Yet our per capita spending on these services is twice that of a country

we regard as a true welfare state. In his speech Mr. Martin sounded wise words of warning when he said that there is no secret formula for paying social security, that it must be paid out of production, and that over-emphasis on social security could cripple any country's economy.

C. J. HARRIS.

Toronto, Ont.
March 8, 1952.

THIRD YEAR WISDOM

You otta' go where the wild geese go. I'm a third year University student and am well enough educated to know that it is the otta' birds, and not geese, that study birds. It's obvious you aren't a well educated as a third year U. of A. student.

WISE GUY.

Edmonton.

GOOD BIRD STUDENTS

I read your editorial "Barn the Wild Geese Go" with great interest. It is noteworthy that any of us, not just professional ornithologists, of which the world has only a handful, can study the most interesting migration habits of birds. Of course, those geologists working in the Arctic have a better opportunity than most of us to learn about the Wild Geese.

BIRD LOVER.

Waskatenau.

NEWS WELCOME

The members of the Home and School of Tomahawk wish you to print our news items in your paper, which we are all very pleased to receive.

MRS. G. E. JOUAN.

Tomahawk, Alberta.

BEFORE COUNTRY ELEVATORS were built, each town and village had its local grain merchant. As (above) merchants made purchases on the street . . . in this way the expression "street price" used in the grain trade today, was coined. This interesting photo is from the National Grain Company's new color motion picture, "Prairie Conquest" . . . a historical movie of the development of western Canada now released to the prairies, and showing in many Alberta towns during the next few weeks.—(National Grain Company, Grain Exchange Building, Winnipeg).

ALBERTANS TO SEE HISTORICAL FILM PRODUCED BY NATIONAL GRAIN CO.

Within the next few weeks, hundreds of Alberta citizens living in areas served by a National Grain Company elevator will be treated to a really different type of film. The new picture, "Prairie Conquest" was produced at Winnipeg and shows the exciting and romantic development of Western Canada — unfolding in historical order.

This is the newest color movie produced by the National Grain Company. It is a 50 minute color film with sound and commentary. It is the story of Western Canada's conquest by people, grain and machinery. The idea originated in the National's Agricultural Department, and took two and one-half years to complete.

Not wheat — but search for a short route to the far east, via the elusive Northwest Passage . . . to the fabled wealth of China, the riches of the Indies, the spices and silks of the Orient lured early explorers up Canada's waterways.

Winnipeg of the early days, wins early attention in the film with scenes of voyageurs led by the intrepid La Verendrye, landing at the city's shores. The roles of the early fur trade and the story of the Hudson's Bay Company in-

cluding a photostatic copy of the original charter and the Great Seal of England are also featured.

Pioneer agriculturists of the day, the persevering Selkirk Settlers of Manitoba's Red River Valley are pictured near the actual ground they struggled over, with primitive sickle, flail, harvesting cradle and wooden plough of 1812.

Shown also, is a copy of the invoice of Oct. 12, 1876, covering the first shipment of 857 1/6 bushels of wheat from a wharf at the foot of Lombard Street, Winnipeg to Duluth. Purchased by R. C. Steele of Steele Briggs Toronto it was shipped there for seed.

There is the story of David Fife, who in his garden at Otonabee, Ontario, through chance produced the first heads of Red Fife wheat, destined to revolutionize the milling and baking industries of the day. There is the testing, breeding, and research work of Sir Charles Saunders in developing Marquis wheat, a feat which raised Canada to the world grain markets.

The building of the Canadian Pacific Railway, to link an isolated nation in the making, the picturesque Red River ox cart and the prairie covered wagon vie with scenes of Indians and cattlemen appearing at the historic Northwest Mounted Police Barracks at Fort MacLeod, in southern Alberta.

Machinery, too, plays its part. The film crosses Canada's age of progress to push-button electricity. Big steam tractors and gang-plows, the reaper of 1880, the four horse sweep and hand-fed thresher

Winners In Calgary Seed Fair Competitions

Prize-winning seeds entered from Fort Vermilion to Milk River, and from Acadia Valley to Rocky Mountain House flanked the walls of the east end of the Stampede Corral, Wednesday, as the Agricultural Short Course and Seed Fair got under way.

Sponsored by the Calgary Chamber of Commerce, the Alberta Department of Agriculture and the Calgary Exhibition and Stampede, the event drew almost 300 people during the afternoon session, almost double the morning attendance.

Winners of the Championship of the cereal division of the seed fair went to Stainer Ball of Red Deer for his entry of Lorraine oats, while C. W. Cox of Grande Prairie won the forage division with an entry of alsike.

Other winners in the cereal division were:

Oats: M. B. Schnurer, Sangudo; Thomas, F. Rhatigan, South Edmonton.

Malting barley: J. S. Duguid, Edmonton.

Entries were judged by Ted Smith of the University of Alberta, Ron Lister of the plants products division, Dominion department of agriculture, and Aubrey Robertson, representing the seed trade.

Expect To Get Alberta Gas In Winnipeg Soon

WINNIPEG, Man. — (BUP)—An official of the Industrial Development Board predicted today Winnipeg would have natural gas for fuel within three to five years.

George R. Fanset, industrial commissioner for IDB, said the industrial future of the Manitoba capital looked rosy as a result of the nickel prospects at Lynn Lake in the north and the search for oil in the south-west.

Fanset told a local club recently, that during the past 25 years, industrial production had increased from \$271,000,000 to \$874,000,000 in the city. There had been a steady change from a chiefly agricultural to a well-balanced varied economy in Greater Winnipeg, he said.

All Conveniences

HASTINGS, Neb. — A house-for-sale advertisement in the want ad section of the Hastings Tribune points out there is "a bomb shelter on the premises."

and straw-burning threshing machines prove agriculture's claim to the science of today.

Some out-of-date machinery was loaned by the Western Development Museum at Saskatoon; still other tools had to be constructed from patterns when the originals fell apart.

The country elevator of 1880 was a flat warehouse for handling the farmer's grain . . . a method slow and laborious to modern huge terminal elevators at Fort William, all within the space of 38 years! It's all there, together with the modern sentinel of the prairie. . .

Filming took place in the prairie provinces of Alberta, Saskatchewan and Manitoba, with additional scenes at the Lakehead.

Research, historical settings and script were by Fred C. Vodrey, Agricultural Manager, National Grain Company, and production and photography by F. J. S. Holmes, Winnipeg.

The movie is now released over the Nationals' country circuit to be shown by fieldmen of the Company to an estimated 300 towns in the west. Of the 96 people who took parts in the film 24 are employees from the Company's branch offices, including Winnipeg, Calgary, Saskatoon and the Rivers district of Manitoba.

Science Aids In Cancer Control

Widespread use of established cancer-fighting techniques can help curb the high mortality toll in three major forms of the disease, an authority disclosed today.

Dr. O. H. Warwick, Medical Director of the Canadian Cancer Society said, that the techniques are part of "a blueprint for the immediate future which promises to bring a sharp reduction in cancer death."

He listed the three techniques as:

A method of breast self-examination by which adult women can assist the physician in early diagnosis;

Mass screening of the chest by x-ray pictures to detect lung cancer;

A vaginal smear examination twice a year for all women over 40 to help control cancer of the cervix.

Dr. Warwick said that in the United States and Canada about 115,000 new cases in the three sites develop each year, including 50,000 of the breast, 45,000 of the uterus and 20,000 of the lung.

A motion picture, "Breast Self-Examination," produced for the Canadian Cancer Society and the National Cancer Institute, has been seen by about 1,000,000 women. Preliminary reports indicate heartening results in the number of lives saved, Dr. Warwick said.

The vaginal smear, a means of detecting cancer by microscopic examination of cells was described by the authority as "an excellent method of diagnosing the disease while it is confined to the cervix and has not begun its invasive attack on the pelvis."

A portion of the funds raised in next April's Cancer Crusade will be employed to promote wider use of the three lifesaving techniques.

Edmonton

The Provincial Secretary's Department starts issuing 1952 passenger car license plates on March 28. New plates have already been shipped to many of the 220 issuers throughout the province and others are being dispatched daily. All issuers will have plates in their hands in time to commence issuing next week.

In former years the issuing of passenger car licenses was commenced at an earlier date. This year the delay has been occasioned by the fact that steel shortages prevented the manufacturer from supplying requirements in sufficient time to permit issuing at an earlier date.

Applicants are particularly requested to complete forms of application for renewal of registration for the car and renewal of driver's licenses at home and present these forms when applying for their new plates. This should be done regardless of whether the driver is operating the same car as last year or not.

Application forms for renewal of registration will be mailed to all motorists who had a passenger car registration last year. These applications should be in motorists' hands on or before March 28.

The new plates are of a "permanent" type which means they will be used for two or more years, depending on how long they will last. The new license plates issued are required to remain with the car, that is, if the owner of a passenger motor vehicle sells or transfers his car, the license registration and plates must also be transferred to the new owner.

ALBERTA ALMANAC

BY RON WOLCH

MT. FORBES (WEST OF THE BANFF-JASPER HIGHWAY) IS THE HIGHEST PEAK IN ALBERTA—11,902 FT.

ALBERTA HAS ONE OF THE MOST VARIABLE WINTER CLIMATES IN THE WORLD

heap lonely in these parts!

In 1882

THE FIRST CENSUS IN THE PROVINCE WAS TAKEN—ALBERTA'S POPULATION WAS 18,076. 69 YEARS LATER IT HAS RISEN TO OVER 900,000!

Smart Cooks Discover Mushroom Soup

HAPPY is the homemaker who keeps several cans of cream of mushroom soup on her kitchen shelf. She can breeze easily through those family requests for a fine meal—in a hurry.

You've probably found how much mealtime help is in this triple-talented mushroom soup. As you plan the family's fare for a week, remember the special good ways it can brighten menus and simplify cooking.

1. As the main hot dish.
2. As a savory sauce for meats or vegetables.
3. As a cooking sauce for casseroles or creamed dishes.

For some "wonderful eating" ideas with mushroom soup, try these:

Mushroom Soup 'n' Sandwich Pats: A big tureen of steaming fragrant mushroom soup is a meal in itself served with an assortment of sandwiches. Garnish the soup with crisp bacon curls or browned onion rings. For an All-In-One Sandwich, fill split buns with sliced ham; top ham with onion and green pepper rings, and lettuce. As dessert, serve chilled canned peach halves in their juice; fill halves with whole cranberry sauce.

Mushroom Sauce for Chops: After chops (pork, veal or lamb) are pan-fried and ready to serve, remove them to a platter and prepare this mushroom soup-sauce. Blend together the soup, about 1 tablespoon of meat drippings and the browned bits of meat in the skillet; stir in 1/4 cup of milk. Makes enough sauce for 4 to 6 chops.

Mushroom Scalloped Potatoes: Use 5 cups of sliced cooked potatoes for this. To make the sauce, blend 1 can of mushroom soup with 1/4 cup milk, 1 tablespoon minced onion, 1/4 teaspoon salt, and a dash of pepper. Alternate layers of potatoes and sauce in a 2-quart casserole. Dot top with butter. Bake in a moderate oven (375°F.) for 30 minutes. Makes 6 servings.

SOUP SCOOPS

SPAGHETTI AND TUNA BALLS: Take two cans of spaghetti in tomato sauce with cheese and serve with crisp-browned tuna balls for a glad new variation of spaghetti 'n' meat balls. To make the tuna balls, first prepare a white sauce from 2 tablespoons butter, 2 tablespoons flour, and 1/4 cup milk. Add 2 teaspoons lemon juice, dash of pepper and 1 cup of tuna. Chill; shape into 12 balls; dip balls in bread crumbs, beaten egg, and again in crumbs. Brown these in hot shortening; add spaghetti and heat. Arrange balls around spaghetti on a platter.

IS YOUR NEW YEAR'S RESOLUTION to spend more time with the family, less time around the kitchen? Then have plenty of cans of soup on hand. It's the family's first choice for minute-quick meals. This time of year they'll like hot tomato or vegetarian vegetable soup. On each plate with the bowl of soup, put a toasted peanut butter sandwich and salad of fresh pears and cottage cheese.

CANADIAN SAILORS conduct classes on board a South Korean minesweeper. In the top photo Lieut. E. A. Wiggs of Quebec City, teaches English to four South Korean officers. Meanwhile, in another part of the minesweeper, AB Jerry Peterson of Olds, Alta., left, and AB David Campbell of Cal-

gary, centre, instruct three South Koreans in how to operate a Eren gun and Lanchester rifles. The Canadian group under the charge of Lieut. Wiggs was placed on board the minesweeper from the destroyer HMCS Cayuga for liaison duties during a recent patrol off the west coast of Korea. (National Defence Photos).

JOHN LUND who scored a success on the Broadway stage, continues his success in Paramount's "To Each His Own" in which he stars opposite Olivia DeHavilland. John, so the critics say, looks and acts like Alan Ladd's cousin.

No British fair or exhibition would be complete without puppets, and the British Industries Fair, which will be held from May 5 to 16 this year, is no exception. There is one big difference between the ordinary exhibitions and the B.I.F., though, at the latter, world's largest industrial exhibition, the concentration is on the puppet as an article of trade, not of entertainment. Yearly at the B. I. F., hand-made British puppets are sold to buyers from all parts of the globe.

COUNCILLORS REQUEST CUT IN
SCHOOL DIVISION BUDGET

(Continued from Page 1)

and the cost of rebuilding the
fence at the Rlopel school.

On the motion of Mr. Allen it
was decided to apply to the Mor-
inville Utilities Limited for ser-
vice pipe to supply natural gas to
the divisional office building at
Morinville.

On the motion of Mr. Messier it
was decided to supply a three-
drawer filing cabinet to Sister La-
pointe, principal of Legal school,
as requested.

On motion of Mr. Cunningham
it was decided to engage Mr. Wal-
ter H. Mowser, piano-technician, to
tune and repair pianos in division-
al schools for the year 1952 at the
same terms as prevailed in 1951.

A delegation from the St.
Charles School District called to
interview the board. A request was
made for a new school to replace
the old Belle Valley school build-
ing, which had been moved to the
St. Charles S.D. The delegation
had prepared a letter which stated
that "At our own expense if the
divisional board will provide a
foreman, will ourselves carefully
dismantle the present two-room

structure early in July, saving any
worthwhile material, once we have
this board's guarantee that a two-
room replacement will be ready
for use in September.

Mr. Cunningham gave notice of
motion as follows:

"That application be made to the
proper authorities for the approv-
al of additional debenture loan to
the extent of \$25,000—to be used
to replace the old Belle Valley
school building at Mearns, which
has deteriorated to such an extent
that further expenses pertaining
to maintenance is a waste of
money; providing that the demoli-
tion of present building be done by
local labor free of cost to the divi-
sional board; the supervision of
this work to be in charge of a
foreman who would be engaged and
paid by the divisional board; sal-
vaged material to be used where
possible; the work to be carried
out in 1952 if possible and not
later than 1953.

On motion of Mr. Cunningham it
was decided to request the M.D. of
Morinville to high grade the road
between Sections 10 and 15-57-26-4
which will be used as an extension
of the St. Charles bus route.

A delegation from the Redwater
School District called to interview
the board; Messrs. Hess, Marchak
(Nick) Engler, Patry (Marcel),
Mr. Engler spoke for the delega-
tion.

It was requested that the Red-
water River S.D. be transferred
from the Thorhild School Division
to the Sturgeon School Division.

High school facilities and bus
service to the Dunrobin school at
Vimy were desired.

After discussion of the question,
the delegation was advised to con-
tact the Department of Education.

The superintendent's reports
were now received.

Mr. Scott read the minutes of a
special meeting which had been
held at the Granger school on
March 7.

A motion was proposed as favor-
ing centralization at Riviere Qui
Barre to include a bus route as
proposed at this meeting. A ballot
was taken on this motion and was
passed by a vote of 15, for and 3
against.

Another motion was passed—13
in favor and none against; to the
effect that a new school be pro-
vided at Riviere Qui Barre rather
than moving the present Granger
school.

Mr. Scott then read the minutes
of the meeting held in the Poplar
Lake school on March 12. Districts
represented at this meeting were:
Belmont, Horse Hill, Poplar Lake
and Turnip Lake.

The meeting had been called for
the purpose of deciding upon a
high school site proposed for this
area.

A motion moved by Mr. Maynard,
was carried—to the effect that the
location of the centralized high
school be left to the decision of our
representatives on the divisional
board—but urge on the board the
necessity of constructing the high
school without delay.

Trustees Allen and McCue were
present at this meeting.

The matter was tabled for study.
Consideration of the building
program was now given.

On the motion of Mr. Ross it was
decided that as soon as plans and
specifications for the St. Albert
school are ready, tenders be ad-
vertised for firm bids; the heating
to be on a separate tender.

Building—Legal school. On the
motion of Mr. Messier it was de-
cided that the sketch plan as sug-
gested by Mr. McKernan, archi-
tect, be considered for Legal;
structure of the building to be
solid, simple in design, properly
heated, lighted and ventilated with
water and sewer connections, ap-
proximation of estimated cost "to
be as accurate as is fair to pre-
dict and not to exceed \$120,000;
sketch plan to be submitted to the
Department of Education for ap-
proval; if approved detailed plans
and specifications to be secured
from the architect, and tenders ad-
vertised.

It was decided to ask Mr. Mc-
Kernan, architect to meet the
building committee on March 21
at 2 o'clock, to further consider the
plans for the Legal school.

The meeting adjourned at 6:30
p.m.

LETTERS TO LOUISA

Dear Louisa:

I am sixteen years old and our class has a party every Friday night. The town is small and we never go anywhere else. My father is old-fashioned and thinks I am too young to go with a date although we all come home at eleven. Don't you think he should let me go? All my friends' parents think it is all right and let their children go.

Ora. B.

Answer:

I think your father should let you go to your class parties. If the boys and girls are nice and you come in at a reasonable hour, I see no objection to your going.

Louisa.

Dear Louisa:

I have practically lived for my children while they were growing up and now that they are all away from home, I find time hanging on my hands. I made the mistake of giving so much time to the children and their activities that my husband looked for his recreation in things that did not include me. What would you suggest?

M.M.

Answer:

You have made the mistake that so many women do when they become mothers. It is right and proper to be interested in the development of your children but not so much so that you forget to be a wife. That is evidently what you have done and it will be hard for you and your husband to have common interests and pleasures after each of you have

been going your own way for such a long time.

Why don't you learn to play golf? Take lessons and start playing with beginners. Of course your game will not be as good as your husband's but you will begin to talk the same language.

Find other things that he likes to do and try to interest him in doing such things and including you. He may enjoy your company if he has a chance to find out that you are a good companion and interested in what he is doing.

It is too bad for couples to grow apart as they grow older for the time will come when they will be dependent on each other for companionship and if they have few pleasant memories over which to reminisce the last years will be a blank period indeed.

Louisa.

Younger Girls Add To Unmarried Mother Problem

CALGARY, Alberta, (BUP)—Salvation Army records show that unmarried mothers are not confined to any one age, intellectual or economic group.

Major Edna Burrows, superintendent of Grace Hospital here, said that 1,102 girls had been admitted during the past seven years. She said they included school teachers, nurses, business girls, school children and waitresses.

Sixty per cent were 19 years old or less, she said, and there was an increasing number in the 13- and 14-year-old age group.

Salvation Army officials estimate that about one-third of the cases of babies born out of wedlock in Calgary are handled at the hospital.

Press, Radio Co-operate In Work Of Red Cross

The outstanding co-operation of the press and radio in Alberta was praised by A. M. Cairns of Calgary, honorary provincial chairman for Red Cross publicity, when he addressed the Alberta Division, CRCS annual meeting Feb. 22 in Edmonton.

Mr. Cairns gave a detailed report on the work of the Division publicity department and concluded his address by saying "during the past year all forms of mass communication in Alberta have been most considerate and generous. . . I wish to express publicly our gratitude to the newspapers and radio stations of Alberta."

The speaker urged local branches to name an alert publicity correspondent to tell the Red Cross story at a local level as much material depends on local coverage.

He mentioned that the Volunteer, official organ of the Alberta Division, now has a mailing list of 2800.

\$1 for EMBARRASSING MOMENTS

The Editor will pay \$1.00 for every item published on "The Most Embarrassing Moment of My Life." To qualify, items must be true, personal incidents. Address "Embarrassing Moments", P.O. Box 4268, South Edmonton.

Your embarrassing moments in The Sun are very good. Here is one of mine:

While we were visiting friends of ours, my four-year-old daughter wanted to come in from outside. I said "you better play outside with the other children for a while yet, because we must go home soon." My daughter said, "Oh, I want to stay for lunch." I said, "Oh, no, we must go home very soon now." Kathleen replied, "Well, if we don't have any lunch I'm going to stay for supper."

MRS. WM. P. DUNN.
New Sarepta, Alberta.

Some years ago when living in the city we were having friends from a distance for dinner and, wanting to have everything very nice, I carefully planned my meal. For dessert I decided to have pie which called for a meringue topping. Unfortunately, it was one of those days that the meringue could not rise above its surroundings but quietly flattened out, and there was nothing to be done about it. Dinner went merrily on until dessert was served which a small boy at the table refused to eat. His mother becoming annoyed insisted that he finish his meal, so, turning red in the face, the child gulped out: "O.K., I'll eat the pie, but do I have to eat that piece of cardboard on the top?"

THE LIGHTER SIDE

Pains Her

Dinah had been having trouble with an ulcerated tooth for some time before she got up enough courage to see a dentist. The moment he touched her tooth she screamed at the top of her lungs. "What are you making such a racket for?" demanded the doctor. "Don't you know that I'm a painless dentist?"

"Well, huh," retorted Dinah, "mebbe yo' is painless, but ah isn't."

Not a Cure

"There's only one way to get rid of your surplus fat. Exercise, and plenty of it."

"Nonsense. How do you account for my wife's double chin?"

Cancer Crusade Starts April 1st

A two-edged sword with snake-entwined hilt is proving to be an effective weapon against cancer. It is a symbol under which thousands of volunteers of the Canadian Cancer Society pursue a program that helps to save the lives of 10,000 Canadians every year. This is the emblem of the cancer crusade and the Canadian Cancer Society.

The shining blade of the sword reflects the zeal of cancer crusade volunteers. The caduceus, which forms the hilt, emphasizes the medical and scientific nature of the Canadian Cancer Society's program. The twined serpent classically represents healing of the sick and the creativity of the healthy.

Under the sign of the cancer sword, the Alberta division of the Canadian Cancer Society last year made over \$127,000 available for research into cancer's causes and cures; thousands of cancer patients were aided by providing them with surgical dressings, drugs, and appliances, and other facilities for their care; while the vital message that "early cancer is often curable" was brought to many more thousands.

The goal for the 1952 cancer crusade in Alberta is \$175,000. The Crusade starts on April the First.

Pinch-Hit

As the tightly-packed elevator descended, graying Mrs. Morton became increasingly furious with her husband standing beside her. His face was flushed and aglow with delight—and because the blonde girl was crowded against him.

As the elevator stopped on the main floor, the blonde suddenly whirled, slapped Mr. Morton, and said: "I'll teach you to pinch."

Bewildered, and no longer aglow, Mr. Morton was half way to the parking lot with his wife, when he choked: "I—I didn't pinch that blonde girl."

"Of course, you didn't," said wife consolingly. "I did."

He Found Out

Our portly neighbor who hasn't gone shopping with his wife for 10 years, demanded to know where all the grocery money was going to.

She told him to stand sideways in front of the mirror.

Treating Seed Means Better Crops

Seed treating and cleaning is the first step every farmer in Western Canada should take this Spring to insure increased yields of high quality, smut-free grain in 1952.

Why Seed Treatment? As we pointed out in our last article a very serious smut situation exists in Western Canada. The common cereal smuts can be easily, effectively, and economically controlled by seed treatment. Furthermore, seed treatment gives good control of certain other destructive seed-borne diseases of small grain crops, and protects the seed against soil-borne diseases such as the seed rots and seedling blights.

Recommended Treatments. The officially recommended seed-treating chemicals for 1952 are: Agrox C, Capstan M, Leytosan, Mergamma C and Panogen. These chemicals are highly effective in controlling most seed-borne diseases of cereals, except loose smut of wheat and barley. The chemicals "Anticarie" and "Bunt-No-More" will control bunt of wheat, but they will not control the smuts of oats and barley. Be sure and treat dry seed of wheat and flax at least 24 hours before seeding. With dry seed of oats and barley, however, best results are obtained when the seed is treated at least one week in advance of seeding. Don't use artificially-dried grain for seed unless you know it germinates satisfactorily.

Treatment of Damp Grain. Under no circumstances should "tough and damp" grain be treated with Formalin or Bluestone. Wheat, oats and barley with a moisture content of more than 16½%, and flax with over 12% moisture, should not be used for seed unless a germination test has shown that it germinates satisfactorily—65% or higher. Moist grain of good germination should be treated with an approved chemical disinfectant, but such seed should not be treated earlier than 24 hours before sowing.

The best seed treatment advice we can give to farmers is this. Be wise, be modern, play safe—plant only cleaned, treated seed in 1952.

When in the city shop around
the corner and save.

GREATEST thriller of the A.C.T.-CFRN Search for Talent Show held each Saturday night through northern and central Alberta, is the "Flying Dutchman" on roller skates, executed by the trio shown above. Eric Eichman is the anchor man; Mel Gardner twists into the nose-dive position and Roy MacDonald provides the necessary balance on Eichman's shoulders. Entire roller skating show is conducted on a circle only eight feet in diameter.

District Farmers Win Prize Grain Awards

Ernest Ewanchuk, Hairy Hill, won first prize in the barley exhibit at the Provincial Junior Seed Show in Calgary recently.

In the wheat class Vilet Mohr, of Fort Saskatchewan, was second. In oats, Orest Youzwishin, of Myrnam was second, with Eliz Schnurer, of Sangudo, fourth in the oats. Daniel P. Holt, of Peace River, was second in the feed barley class with Evelyn Briggs, Bon Accord, third in the malting barley class.

Imperial Bank Starts Series Cartoon Ads

To promote its new slogan, "the bank that service built," and to provoke readership, the Imperial Bank of Canada is starting in April semi-cartoon-type ads with rhyming copy in more than 200 newspapers throughout Canada.

According to the agency, McKim Advertising Ltd., cartoon type advertising has never been used by Canadian banks—except in college publications, never in dailies or community weeklies.

\$1 for BRIGHT SAYINGS

The Editor will pay \$1.00 for each child's saying printed. To qualify, it must be true, personal remarks of a child known to the writer. Address "Bright Sayings", P.O. Box 4368, South Edmonton.

Our 4-year-old citybred could was very interested in his first visit to our farm. Anxious to know about the animals, we said "That cow over there is a Jersey." Johnny replied, "How can you see the license plate from here?" S. M. Cooldge, Alta.

In class one day the teacher, Miss Frazer, defined the word "anecdote". She gave several examples of the word, then asked the pupils to use the word in a sentence. Harold, one of the pupils, remembered Miss Frazer say that an anecdote was a short, funny tale. Harold thought for a moment and then said, "A rabbit has four legs and an anecdote."

Onoway, Alta. Gordon Adam.

In the course of an English lesson the teacher wrote on the blackboard: "He was bent on seeing his old school!"

The teacher then said, "Now, Johnny, I want you to study this sentence and put it in your own words."

After thinking for some time Johnny cheerfully replied, "The sight of his old school doubled him up."

Operetta Presented

(Continued from Page 1)

tion; Arlene Fluett of Barrhead as the new Irish gardener's daughter, who with her little Irish brogue sang her way into the hearts of her listeners.

Chas. Bashand and Leonard Rousseau of Morinville and Remi Soetaert of Villeneuve, impersonating three women gossips, proved beyond a doubt it is "a sin to gossip," and added much merriment to the program in general.

A short concert hour, prior to the operetta, was given by Hilda Frolish, pianist; Reva Grant, soprano, and David Middleton, violinist, who with the magic of his bow, played two violin selections.

Morinville is proud of this group of entertainers and will look forward to their next operetta in the near future.

Jeffrey Resident Passes On

Mr. George Hill passed away on the evening of March 11 in an Edmonton hospital. Mr. Hill was 72 years of age, and had lived about 45 years in the Half Way Lake district and was well known and respected in Clyde and Jeffrey.

Mr. and Mrs. Hill celebrated their golden wedding about three years ago.

He leaves his wife, three sons, Melford of Farydale, Melvin of Barrhead, and Leon of Half Way Lake; and one daughter, Mrs. Clarence Davis of Clyde; also one sister, Mrs. Kelly of Edmonton.

The funeral service was held in the Clyde United Church, with Rev. J. Bainbridge officiating.

The pallbearers were Messrs. Clarence Starr, Pat Nugent, Arthur Genest, Harry Critchly, Garth McNally, and Percy Fry.

Many friends attended and there were many lovely flowers.

Flin Flon, third largest centre in Manitoba, was named after Flintabatty Flonatin, a character in the story, "Sunless City."
